Empower your growing business with extended security that's effective, user-friendly and cost-efficient

Kaspersky Next XDR Optimum

kaspersky bring on the future

For small and mid-sized businesses

Kaspersky Next XDR Optimum is for small and mid-sized businesses with an established IT infrastructure and a reasonable cybersecurity budget. Whether security is managed by the broader IT team or a small dedicated group, the solution provides easy-to-manage tools that deliver strong, comprehensive protection without overloading existing resources.

Get the most out of your resources and boost the effectiveness of your incident response

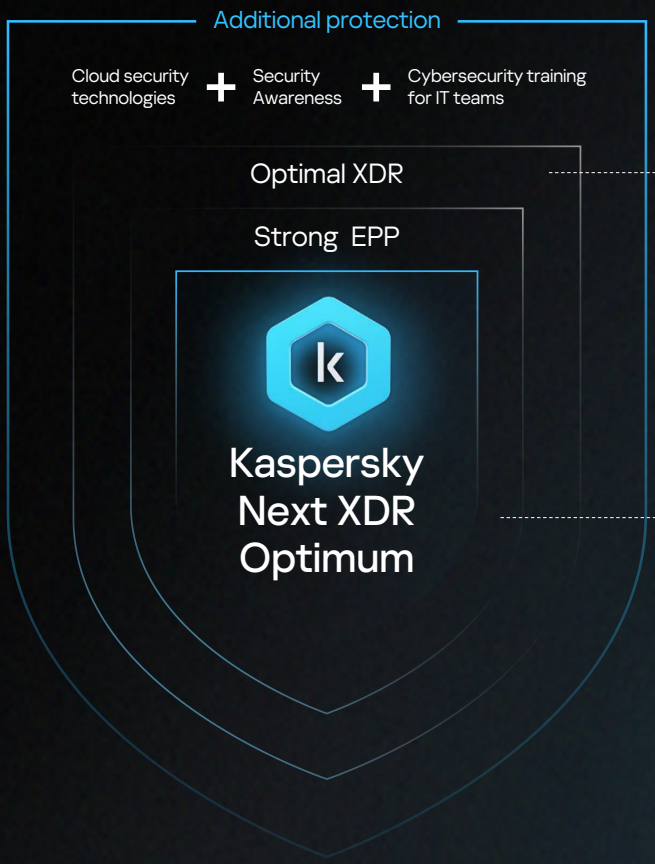
Cyberthreats targeting small and mid-sized businesses are growing more sophisticated and intense. Attackers increasingly exploit legitimate system tools and advanced techniques to avoid detection. Meanwhile, employees unaware of cybersecurity risks are vulnerable to phishing and social engineering attacks, causing financial and reputational damage.

At the same time, limited resources, including tight budgets and a shortage of skilled staff, make defending against these threats even harder. That's why it's essential to have advanced yet easy-to-use tools that deliver the right level of protection for your business.

Extend your security with Kaspersky Next XDR Optimum

Designed for smaller security teams, the solution strenthens incident response and builds expertise without the added burden of time-consuming, routine tasks. With multiple processes automated, your team can focus on what matters most.

Kaspersky Next XDR Optimum integrates easily into your existing infrastructure, with no need to add new system components.



Detection, analysis & response

- Behavioral detection
- Alert aggregation
- Cloud Sandbox
- Threat evidence discovery (IoCs) & custom IoCs
- Root cause analysis
- Range of response actions

Endpoint protection features

- Enhanced anti-malware
- Extended hardening
- Vulnerability assessment
- Endpoint controls
- Data protection
- Patch management

From exceptional endpoint protection and cloud security to IT task automation and essential XDR features:

Unleash outstanding **endpoint protection**

Avoid business disruption with automatic protection powered by industry-proven, ML-based anti-ransomware and anti-malware tools that prevent infections from known and unknown threats.

Fix vulnerabilities through system hardening and training

Reduce your attack surface with system hardening based on user behavior, and save time with centralized vulnerability, patch and encryption management. Plus, we provide all the training your team needs to make the most of your new security capabilities.

Extend your **detection and response** capabilities

Gain insights into threats and how they move within and beyond endpoints. Use automation and guided response to counter attacks, and essential investigation tools to trace their activity.

Train your entire team to play an active role in security

Equip your IT staff and non-technical employees with the knowledge and skills to stay secure. Strengthen your IT security team while building a strong, security-conscious culture across your workforce.

Leverage our cloud-based system for **file processing**

Easily investigate malicious files and gain more context and details with our Cloud Sandbox integration — upload potentially malicious samples to check their reputation within seconds right from the product interface and use generated data for future IoC scans.

Control shadow IT with cloud security you can rely on

Reduce your vulnerability and safeguard your data and employees by controlling shadow IT. See which cloud services are in use, block unauthorized access and identify what sensitive data is stored in Microsoft 365 apps.

Benefit from **various delivery options**

Reduce your total cost of ownership with cloud-based deployment and automation tools, or install on-premises for total control[1].

[1] The on-premises management console is Linux based. Kaspersky Next XDR Optimum supports all operating systems across its endpoint agents and cloud console. A cloud-based deployment option will be available in Q4 2025

Kaspersky Next XDR Optimum — part of the Kaspersky Next product line

Kaspersky Next is a tiered product line for businesses of all sizes. Kaspersky Next Optimum is for small and mid-sized businesses with lean cybersecurity teams that want to scale protection without added complexity. It starts with strong endpoint protection, enhanced by endpoint detection and response features, and enables a smooth upgrade to essential XDR or MXDR for sophisticated level of cybersecurity.

Why Kaspersky Next Optimum?

Built on our best-in-class endpoint solution

For over a decade, Kaspersky products have consistently ranked at the top in independent tests and reviews. Our proven automated endpoint protection reduces the number of alerts security teams need to analyze, improving their efficiency.

Backed by deep knowledge, skills and expertise

Kaspersky Next is built on decades of the accumulated experience and deep expertise of our global security teams. Our specialists work collaboratively to address complex cyberthreats, continuously refining the technologies that power our products. This expert-driven approach ensures our solutions are reliable, innovative and aligned with real-world security needs.

Multi-layered defense based on AI technology

Kaspersky uses predictive algorithms, clustering, neural networks, statistical models and expert algorithms to boost detection speed and improve accuracy.

Cybersecurity that grows with you

Kaspersky Next protects businesses of all sizes. As your needs grow, you can easily scale from essential endpoint protection to advanced, expert-level solutions available in higher tiers.
